Dear Mr. Kruchten,

RE: Woodford County, IL Wind Project Development

This is Chris Green with Tri Global Energy. We spoke on December 18, 2019 in regard to the wind energy project we are developing in Woodford County, IL. We initiated the development of this project in July 2018 and now have approximately 32,000 acres of land leased and many other permitting steps completed for the project to accommodate up to 400 MWs of wind turbine power generation.

Per our conversation I have attached the Cultural Resources Desktop Review ("Report") prepared by Stantec. I also emailed this Report to you on December 19, 2019 along with a KMZ of the boundary of the project area which rests in Clayton, Minonk, Panola, and Greene townships in Woodford County, IL.

Based on your review of the Report and the project area can you please let us know what cultural surveys and other investigations your office will require. Our intent is to file for the County's Special Use Permit at the end of February and we will need your office's consultation/recommendation letter finalized by then if possible.

Look forward to your review and please don't hesitate to contact me with any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "C. Green", with a stylized flourish at the end.
