Nationally Accredited by PHAB

night, 3,179 in Illinois were reported to be in the hospital with COVID-19. Of those, 661 patients were in the ICU and 348 patients with COVID-19 were on ventilators.

The preliminary seven-day statewide positivity for cases as a percent of total test from January 15–21, 2021 is 5.0%. The preliminary seven-day statewide test positivity from January 15–21, 2021 is 6.2%.

Beginning today, IDPH has adjusted reporting probable cases, which caused an artificial one day increase in cases of 1,903. Previously, only confirmed deaths were included in the total case count. However, the total case count includes both confirmed and probable cases. Therefore, probable deaths are now being included in the total case count. Confirmed deaths and probable deaths will still be reported separately.

As of last night, 922,325 doses of vaccine have been delivered to providers in Illinois, including Chicago. In addition, approximately 524,050 doses have been allocated to the federal government's Pharmacy Partnership Program for long-term care facilities. This brings the total Illinois doses to 1,446,375. IDPH is currently reporting a total of 616,677 vaccines administered, including 93,683 for long-term care facilities. Yesterday, a total of 44,288 doses were administered. The 7-day rolling average of vaccines administered daily is 24,190 doses.

*All data are provisional and will change. In order to rapidly report COVID-19 information to the public, data are being reported in real-time. Information is constantly being entered into an electronic system and the number of cases and deaths can change as additional information is gathered. For health questions about COVID-19, call the hotline at 1-800-889-3931 or email dph.sick@illinois.gov.
